Logesh S

JUNIOR DATA ANALYST

Tirupur, Tamil Nadu | 8072498778 | logesh2545@gmail.com

linkedin.com/in/s--logesh | github.com/Logesh2330

PROFESSIONAL SUMMARY

Junior Data Analyst with practical knowledge of Microsoft Excel, SQL, Power BI, and Python. Familiar with data cleaning, validation, analysis, dashboard creation, reporting, and identifying trends and patterns in datasets. Able to use Excel formulas, Pivot Tables, SQL queries, and Power BI visualizations to organize data and communicate business insights. Detail-oriented, analytical, and eager to learn.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Validation, Data Analysis, Data Visualization, Reporting
SQL: SELECT, WHERE, GROUP BY, ORDER BY, JOIN, Subqueries, Aggregate Functions
Microsoft Excel: SUMIFS, INDEX/MATCH, VLOOKUP/XLOOKUP, IF, COUNTIF, Pivot Tables, Charts, Slicers, Data Cleaning
Power BI: Power Query, Data Modeling, DAX Basics, KPI Reports, Interactive Dashboards, Drill-through
Python: Python Basics, Data Handling, Basic Data Analysis
Database: Relational Database Concepts, Primary Keys, Foreign Keys

PROJECTS

1. Power BI – Executive Sales & Customer Insights

- Consolidated and transformed operational data using Power Query to prepare it for analysis and reporting.
- Built a structured data model and created calculations to track monthly growth, yearly revenue trends, and profit margins.
- Developed an interactive Power BI report with filters and drill-through features for performance tracking and KPI evaluation.

2. SQL – HealthPlus Care Database Analytics

- Designed a relational database covering 18 clinics and 220+ medical specialists, using primary and foreign key relationships.
- Wrote SQL queries using joins, subqueries, and conditional logic to analyze provider fees and regional cost distribution.
- Identified pricing differences across clinics and provided insights to support better fee management.

3. Excel – FreshMart Sales Dashboard

- Analyzed and cleaned 2,500+ transaction records to identify and resolve data discrepancies across regional stores.
- Used SUMIFS, INDEX/MATCH, and VLOOKUP to create dynamic calculations, Pivot Tables, and an interactive dashboard with slicers.
- Tracked sales, returns, and payment methods to provide clear insights into store-level performance and profitability.

EDUCATION

Bachelor of Science (B.Sc.) – Computer Science

SOFT SKILLS

Analytical Thinking • Problem Solving • Attention to Detail • Teamwork • Willingness to Learn

LANGUAGES

English • Tamil

AREAS OF INTEREST

Junior Data Analyst • Data Analyst • Reporting Analyst • Business Intelligence Analyst
